

SV 12 Technical Data

Stand-on high lift truck

first in intralogistics

In accordance with VDI guidelines 2198, this specification applies to the standard model only. Alternative tyres, mast types, ancillary equipment, etc. could result in different values.

	1.1	Manufacturer		STILL
Characteristics	1.2	Manufacturer's model designation		SV 12
	1.3	Power supply (electric, diesel, petrol, gas, mains electric)		electric
	1.4	Type of control (hand, pedestrian, stand-on, rider seated, order picker)		electric
	1.5	Capacity/load	Q kg	1200
	1.6	Load centre	c mm	600
	1.8	Load distance lowered	x mm	690
	1.9	Wheelbase lowered	y mm	1450
1	2.1	Weight (incl. battery)	kg	1400
eigh	2.2	Axle loadings laden drive end/load end	kg	980/1650
Š	2.3	Axle loadings unladen drive end/load end	kg	940/460
yres	3.1	Tyres (rubber pneumatic polyurethane)		Polyurethane
	3.2	Tyre size drive end	mm	a 250 x 100
	3.3	Tyre size	mm	4 x a 85 x 60
<u> </u>	3.4	Support rollers drive end	mm	2 x ø 125 x 50
sels	3.5	$\frac{drive end}{drive end}$		1x/3/4
Å	3.6	Track width drive end	h ₁₀ mm	507
	3.7	Track width load end	h11 mm	380
	1 2	Closed mast beight	h mm	soo mast tablo
	4.2		he mm	see mast table
	4.5		h. mm	see mast table
	4.4	Laicht maat raiaad	h. mm	see mast table
	4.5	Initialbub	h- mm	
	4.0	Initialitud	h mm	1245
	4.9	Height of steering wheel min. max.	his page	1345
ons	4.15			90
ensi	4.19			2080
Di	4.20	Current width	I2 MM	930
	4.21			/90
	4.22		s/e/i mm	54/184/1150
	4.24	Fork carriage width	D3 MM	680
	4.25		D5 mm	564
	4.31	Floor clearance, centre of wheelbase	m1 mm	30
	4.34	Working alsie width with 800 x 1200 pallet lengthwise	Ast mm	2340
	4.35	Outer turning radius	Wa mm	1630
nce	5.1	Speed laden/unladen	km/h	//9
	5.2	Lifting time laden/unladen	m/s	0.17/0.20
rma	5.3	Lowering time laden/unladen	m/s	0.3//0.31
erfo	5.8	Gradeability laden/unladen	%	8/12
	5.9	Acceleration time (over 10 m) laden/unladen	S	/.3/5.6
	5.10	Brakes		electric
ors	6.1	Drive motor, rating S2 = 60 min.	kW	2.0
Electric Moto	6.2	Hoist motor, rating at S3 = 15%	kW	3.0
	6.4	Battery voltage, capacity K₅	V/Ah	24/420
	6.5	Battery weight ± 5% (dependimg on manufacturer)	kg	370
	6.6	Energy consumption according to VDI cycle	kWh/h	1.1
Other	8.1	Drive control		electronic
	8.4	Noise peak at operator's ears	dB (A)	< 70

Mast table.

SV 12									
	Tele	mast		HiLo mast

2275	150	3545	4080	2275	1740	3545	4080		
2375	150	3745	4280	2375	1840	3745	4280		
2575	150	4145	4680	2575	2040	4145	4680		

Capacity table.

kg	up to h₃ mm		
1 200	2700		
1100	3000		
1000	3300		
900	3600		
800	3900		
600	4145		

The STILL SV 12.

- Stand-on high lift pallet truck designed for a high turnaround of goods in racking, when loading and unloading, as well as for horizontal transport of goods up to 1200 kg.
- With compact length and overall width of less than 800 mm, normal commercial pallets can be handled. The SV is also very flexible when used for order picking and as a working/lifting table.

Driver's compartment.

- The driver's standing compartment is also fitted with a bucket seat to allow the driver to be seated if required.
- A high level of driving comfort is achieved with the padded interior plus integral storage facilities for working papers and utensils.
- Gas-damped non-slip footplate and seat can be adjusted for height by up to 180 mm. Adjustment is smooth and easily achieved by a simple push of a button.
- The controls fall easily to hand without changing grip and a clear layout avoids confusion. Drive direction and travel speed are controlled by a butterfly switch with integral buttons for hoist and lower functions.
- Footrests on the right of the footwell prevent fatigue during long horizontal transport runs.
- Standard display gives battery discharge, operating hours and fault code read-outs.

Chassis.

- Very good all round vision and a clear view onto the fork tips thanks to the new rounded chassis contours.
- Robust, torsionally rigid steel frame consists of drive section and load lifting section.
- A patented hinged section gives ideal access to the electrical components. Ease of servicing reduces maintenance costs.
- Good weight distribution and reduced point loading due to the 4-wheel principle ideal for upper storey use.
- Patented friction aids on the fork tips allow non-slip pallet handling.

Steering.

- Full electric steering for 180° lock-to-lock movement without kickback. Steering wheel diameter of only 120 mm and 41/2 turns guarantees fast, effortless steering.
- The steer motor is protected against shocks from uneven floors by a safety coupling.
- Automatic reduction of speed when driving round corners, thereby ensuring a high level of safety.

Drive.

 A robust 2.0 kW shunt wound drive motor provides quick acceleration and powerful ramp travel. Efficient energy utilisation due to the spur and bevel gear transmission.

Hydraulics.

- The hydraulic unit consists of a powerful, high efficiency 3.0 kW pump motor actuated via push buttons in the operating panel.
- Particularly sensitive control is achieved with the proportional valve technology fitted as standard for the main hoist.
- Automatic shut-off of the initial lift is achieved by an overload protection for the hydraulic pump saving energy and reducing noise.

Brakes.

- Two independent braking systems are fitted.
- Generator braking activated by releasing the butterfly switch or changing drive direction guarantees soft braking and protects the brake linings. During braking the drive unit acts as a generator and puts the recovered energy back into the battery.
- An electromagnetic brake acts as a parking brake and emergency brake.
- Starting on gradients is possible without roll-back.
- Automatic brake monitoring is achieved by means of a load sensor, which regulates the braking current to suit the load.

Battery.

- For multi-shift use the battery is changed using the patented battery free lift and a roller track at the side.

Auxiliary equipment.

- Wheel position indicator.
- Return control.
- FleetManager light.
